Skin news

Autumn / Winter 2015

Hello and welcome

Winter is just around the corner again and the colder months are ideal to have treatments like Skin Peels, Microdermabrasion, IPL Skin Rejuvenation and Permanent Hair Reduction as our skins aren't exposed to the sun as much. Its an ideal time to address pigmentation as well.

I have included another generous \$50 Voucher to use towards your next treatment. I look forward to seeing you soon.

Ultra C10+ Firming Serum

with MicroElastin® & MicroCollagen

Annual Leave

I will be taking a break this year from 6th July until 31st July. The diary will fill up in June so book ahead to avoid disappointment.

While I'm away I will be training with Larra Johnson in Manchester (Cosmetic Tattoo perfecting Brows and hair strokes techniques).

I look forward to bringing back new knowledge, skills and international qualifications to Adelaide.

Skin Needling

My New Favourite treatment is the Skin Needling using the Needling Pen. I find the results more intense than the roller and the pen is easier to get in around the mouth and eye area. It is a less expensive and invasive option to skin rejuvenation over fraxel and laser resurfacing.

Beneficial not only for anti aging but to improve the appearance of stretch marks and acne scars.

What are the benefits of Direct Needle Therapy (DNT)?

DNT is a powerful skin rejuvenation and scar conversion to help promote the regeneration of collagen and visibly firm and smooth the complexion. This treatment works to visibly reduce the appearance fine lines & wrinkles, coarse texture and dull skin tone.

How does it work?

DNT uses nine ultra-fine medical grade stainless steel needles in a disposable cartridge that vertically pierce the skin, creating multiple channels to induce a skin repair response. The device has the ability for speed adjustment up to 100 oscillations per second, along with a varying needle depth dial, which allows you to treat different areas of the face or body at different intensities. During the DNT process, growth factors are stimulated and in turn are released into the skin. These growth factors help promote a scarless skin repair process and allows for a breakdown of existing abnormal scar collagen in order to normalise collagen. DNT allows for deep absorption of essential vitamins and antioxidants while optimising cell function, making it the ideal treatment for all skin types of varying concerns.

Never stop learning

In March I attended a 3 day conference on the Gold Coast for the Association of Cosmetic tattoo. Dr Linda Dixon (USA) is world famous and the guest speaker. She developed the slope needle that I use for many of my procedures. The third day was dedicated solely to infection control.

Hairstroke Brows are becoming increasingly popular. The aim is to produce a natural looking brow with curved tapered hairstrokes. Otherwise some clients prefer a powdered brow which heals to a penciled in look.
